

## Timeline Findings Summary

### OPERATIONAL TIMELINE RECONSTRUCTION

# Timeline Findings Summary

Timeline Reconstruction preserves observed evidence evolution. It does not create historical certainty, causality, remediation status, or operational authority.

## Timeline visual summary

Intervals are bounded by adjacent snapshot captures; counts show events first observed in that capture window.

### Snapshot-bounded interval timeline

Each segment represents the capture window between adjacent snapshots.

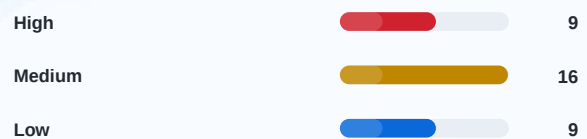

## Provider and significance distribution

Provider-owned findings and operational significance across the selected timeline.

### Findings by provider

### Significance mix

## Timeline trust

Unverified - 1 of 5 selected snapshots are legacy or unverified. Timeline reconstruction can continue only as inspect-only evidence.

3 verified

1 modified

1 legacy / unverified

0 invalid

## Warnings

Timeline is inspect-only: 1 of 5 selected snapshots are legacy or unverified. Timeline reconstruction can continue only as inspect-only evidence.

## Timeline Findings Summary

- Plugin Step Diff changed (6 findings, 4 high, 2 medium). 6 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Workflow / Automation Participation Diff changed (6 findings, 1 high, 2 medium, 3 low). 6 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Operational Profile Diff changed (3 findings, 1 high, 2 medium). 3 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Solution Participation Diff changed (4 findings, 1 high, 1 medium, 2 low). 4 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Entity Configuration Diff changed (2 findings, 1 high, 1 medium). 2 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Relationship Metadata Diff changed (2 findings, 1 high, 1 medium). 2 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Identity Participation Diff changed (9 findings, 6 medium, 3 low). 9 findings first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Column Metadata Diff changed (1 finding, 1 medium). 1 finding first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.
- Choice / Option Set Diff changed (1 finding, 1 low). 1 finding first observed. First observed between May 25, 2026, 3:27 PM to Jun 16, 2026, 4:20 PM.

## Top Timeline Events

HIGH

Account Change Tracking Enabled changed: false to true

Entity Configuration Diff. Entity change tracking configuration differs across snapshots. Change tracking may affect integration, synchronization, and delta-observation behaviour, but DVQR does not infer runtime impact or remediation scope. First observed between...

HIGH

DVQR Score density changed: 42 to 67

Operational Profile Diff. Observed operational-density score differs across snapshots. Use this as comparison orientation, not as health, risk, or root-cause evidence. First observed between 2026-05-25T05:27:12.006Z to 2026-06-16T06:20:23.405Z.

2 evidence references

HIGH

**Relationship removed: lk\_accountbase\_modifiedby (Account to SystemUser, ManyToOne)**

Relationship Metadata Diff. This ManyToOne relationship (account to systemuser) exists in the source snapshot but is missing in the target. Relationship drift can occur when lookup fields or relationship metadata are removed, renamed, added, or changed between snapshots....

HIGH

**Power Pages Runtime Core changed from Managed to Unmanaged**

Solution Participation Diff. Observed solution package metadata differs across snapshots. Use this as deployment/layering orientation, not as proof that a deployment caused runtime behaviour. First observed between 2026-05-25T05:27:12.006Z to 2026-06-16T06:20:23.405Z.

## Evidence boundary

This report summarises changes first observed between selected evidence snapshots.

It does not prove the exact time, actor, cause, remediation status, or operational authority of any change.

Snapshot evidence remains workspace-owned. DV Quick Run organises and presents investigation evidence; it does not create historical certainty.
